

# HTTP GET

## DEFINISI

Teknik pemrograman javascript  
yang digunakan dalam proses pertukaran data  
tanpa melakukan refresh pada sebuah halaman website

## DEFINISI

## DATA FORMATS

HTML → 

```
<html >
...
</html >
```

XML → 

```
<?xml version="1.0" ...
<events>
...
</events>
```

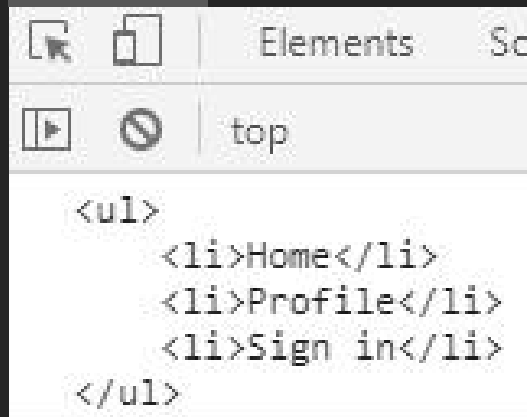

JSON → 

```
{
  "name": "Ahmad",
  "address": "Rajawali"
}
```

## LOADING HTML

```
fetch('produk.html')  
  .then(response => {  
    return response.text();  
  })  
  .then(result => {  
    console.log(result);  
  });
```

output :

```
<ul>  
  <li>Home</li>  
  <li>Profile</li>  
  <li>Sign in</li>  
</ul>
```

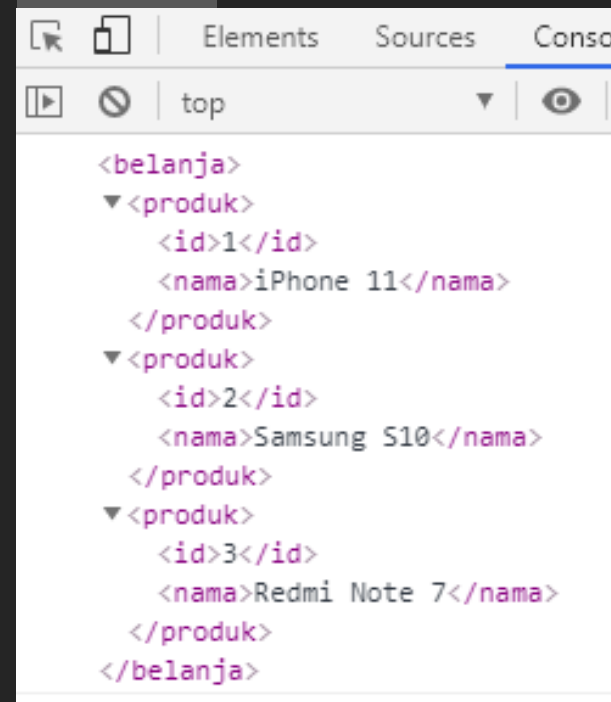

## LOADING XML

```

fetch('produk.xml')
  .then(response =>
    { return
      response.text();
    })
  .then(result => {
    var parser = new DOMParser().parseFromString(result, 'text/xml');
    console.log(parser.getElementsByTagName('belanja')[0]);
  });

```

output :

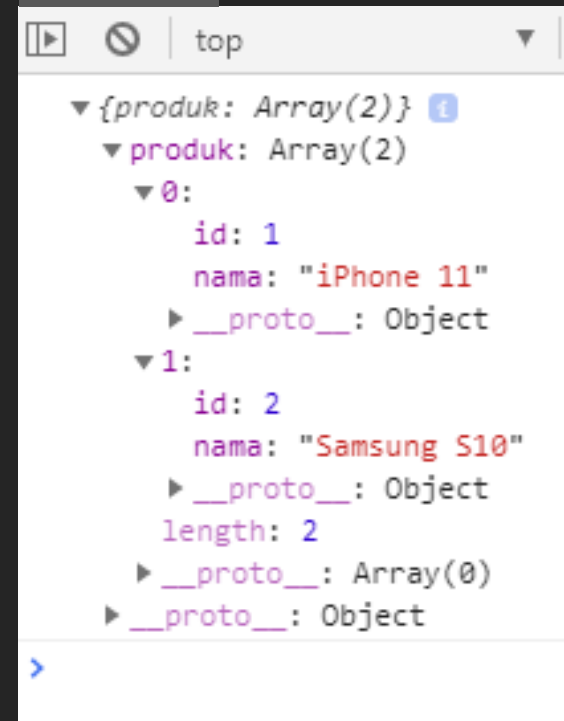

## LOADING JSON

```

fetch('produk.json')
  .then(response => {
    return response.json();
  })
  .then(result => {
    console.log(result);
  });

```

output :

Terima kasih
